

Gasch Printing is proud to announce the launch of a long overdue new website. Not only does the new site look much better, but brings with it a wealth of new features giving users access to all of their past order and quote history in our new customer portal center. Below is a brief tour of some of the features.

Send A File:

Our most widely used aspect of our website is the ability to transfer files securely to us to print. Regardless of the size, you can send your print files easier than ever through the send a file button that is always located on the top right of every page on the main toolbar.

Customer Portal:

The biggest new features of this new site are built into our new customer portals that are automatically setup for all customers. This portal gives you access to all past quotes and jobs as well as shows you jobs in progress and gives the ability to manage and pay for your jobs all online.

When visiting the portal for the first time, simply click the log in button on the top left of the main toolbar. The first time visiting the portal you will need to set up your account by clicking the recover details button on the login page. Then after entering the email you have used with Gasch Printing in the past you will be able to create a password and log into your portal.

Once into the portal, the system automatically recognizes your email address and gives you immediate access to your past quote and job history as well as listing all of your jobs in progress now.

View Quotes and Order Online:

Take advantage of the ability to place an order online while viewing the details of your quote and select the quantity you like to get the job started immediately at Gasch.

Custom Quote Builder:

One of the biggest improvements on the site is the new custom quote builder. Not only does it visually show you the binding differences, but based on your selections it will automatically adjust the available options based on your criteria to ensure you are selecting the best print options for your job. We have also taken the liberty of pre-selecting the most common and cost effective options for those that want to keep things simple and quick.

Choose your binding type.
